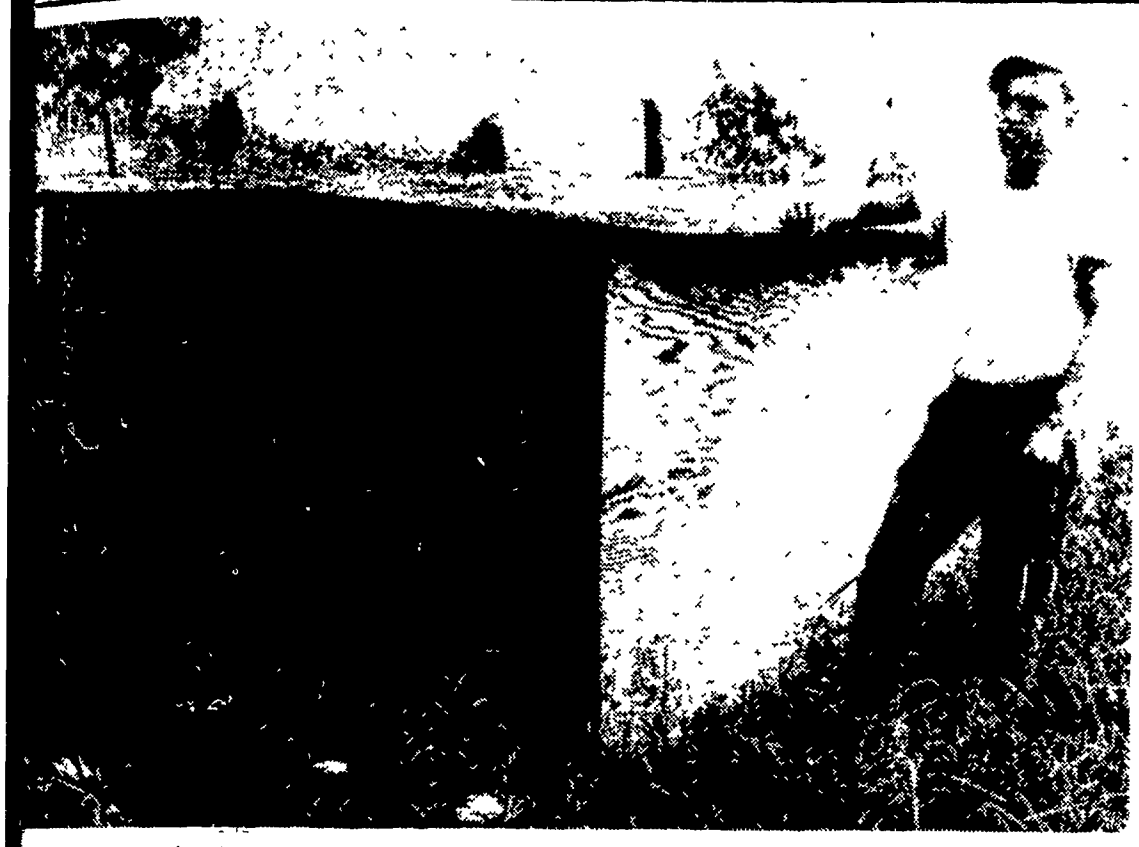
Lancaster Farming

VOL. 8 No. 45 | Lancaster Farming, Saturday, October 12, 1963 | $2 Per Year



THIS PLYWOOD SHELTER IS ALL THE protection needed by a sow and her litter on the farm of Walter and Jacob Augsburger, Reinholds R1. Four sheets of exterior plywood form the sides and two more make the roof. Walter Augsburger, shown here, places the shelter over the little pigs after they are born. L. F. Photo

Hogs Like To Be Alone On The Augsburger Farm

Should the herdsman be in constant attendance when a sow is farrowing?

Walter Augsburger and his father, Jacob, of Reinholds R1, do not think so. "A hog likes to be left alone, but you have to know what she is up to" Jacob said recently as he described his sow program.

The Augsburger partnership farrows about 30 sows, twice a year, without the use of crates, farrowing house, or any special farrowing equipment

The sows are on pasture 365 days a year and the pigs are born wherever the sow decides to make her nest.

"When the sows are farrowing, we may walk through the meadow three or four times a day, but we don't go near the sow while she is farrowing," Walter said. The sows find a quiet place in the pasture, cut down grass and weeds for a bed and farrow their litters with no help from the owners. After the sow has finished farrowing, Augsburger picks up a shelter with the loader on his tractor and sets it down over the nest of pigs

The 30 sows have the run of about 20 acres in two lots and they, or their litters, are never confined to a shelter until the pigs are weaned to go into the feeding pens.

With a stream for water and the ground for a feeding floor, the only equipment needed for the sow program is a fence and a movable shelter Augsburger made the shelters out of six sheets of outdoor plywood — one for each side and two for the roof — and has found them to be very satisfactory.

But what about number of pigs per litter?, some hog men ask. Augsburger says he has marketed nine pigs per sow -

Second Generation Dairy Heifer In Cloister FFA Calf Chain

The Cloister Future Farmers of America Chapter has seen its calf chain go into the second generation.

Last week Irvin Schannauer Jr, Reinholds R1, received the first heifer calf offspring of the calf ring.

The original calf in the ring was purchased by the chapter from the herd of George Rutt, Stevens R1, and presented to Ray Kline, Stevens R1, two years ago. Kline's cow, Garwood Lady Posch, was bred to Cochran General and dropped her first calf during the summer.

A committee, composed of Thomas Zartman, Thomas Spitler, Stanley Leininger, Dave Zimmerman, Barry Hirneisen, and Paul Weaver, all students at Ephrata High School, selected the freshman vocational agriculture student to receive the calf.

Irvin was selected from among 10 boys on the basis of an application outlining his feeding and health program, and a list of the approved practices he plans to use in caring for the calf. He has agreed to breed the heifer to a proven bull and return the first heifer calf to the chapter.

Clifford Bollinger, Lititz R4, has the chapter's other chain calf, a 15 month old Holstein heifer. The chapter also has

Danish Youth Sees Farms Much Like Those At Home

I thought there would be more difference in agriculture in the United States and Denmark, Frede Helth, and International Farm Youth Exchangee said this week.

Helth is staying in the home of Mr. and Mrs. Leroy G. Myer, 410 Willow Road, while he is in the county.

When asked to name the most interesting thing he has noticed since he came to America in May, Helth pointed out the similarity of agricultural production in the two countries.

However he did point out some differences. Very little corn is grown in his native Jutland Peninsula. Sow beets form the major portion of the roughage for dairy herds, and almost every farm has dairy cows, he said.

The beet tops are chopped for the silo but the roots are stored in trenches or on open ground with straw and soil over them. During the winter, the beets are chopped and fed raw along with a barley, oats and rye, and protein mixture.

Helth, twenty two, said he plans to return to his native Denmark and apply for admission to an agriculture college. His education was interrupted at the end of seventh grade, but he learned English through a correspondence course.

He has two sisters and one brother, all younger, but he says his brother who plans to

(Continued on Page 6)

SCD Sets Meet With Associates

The Lancaster County Soil Conservation District Directors have set October 15 as the date for their annual meeting with Associate Directors.

Henry E. Givler, secretary of the district this week urged all associate directors to attend the meeting in the Production Credit Building, Roseville Road, to discuss several problems facing the district

Beginning at 7:30 p.m., discussion will cover such subjects as "Are we in Lancaster County ready for Project 70?" "How can associate directors do a better job of promoting conservation?" "How can more young people be interested in the job of conservation?"

Representatives from cooperating agencies are also invited to attend.

Second Annual Feeder Sale Is Scheduled

The Second Annual Farmers Field Day and the 9th Annual Feeder Calf Sale, two big events, are scheduled for the Lancaster Union Stock Yards, October 25th.

At the all day affair, the yards will be entertaining the cattle feeders of Eastern United States. Last year farmers from seven Eastern states were represented at this event.

Feature of this year's Farmers Field day will be a presentation and demonstration "Your Beef From Feed Lot To Table", by Mr. Monte Flett,

(Continued on Page 13)

Stoltzfus Cow Tops DHIA

A registered Holstein cow in the herd of Dan S. Stoltzfus, Mount Joy R1, finished the highest 305 day lactation in the Red Rose Dairy Herd Improvement Association during August.

Candy made 883 pounds of butterfat in 20,540 pounds of milk with a 4.3 test.

David S. Smucker had the second high cow with 846 pounds of butterfat, 23.429 pounds of milk and a test of 3.6 per cent. The cow was a grade Holstein.

The high average for the month was made by the 29-cow mixed herd of Phares K. Huber, Reinholds R1. The herd made an average of 58 pounds of butterfat in 1,542 pounds of milk with a 3.8 per cent test.

Second high average was the 56 pounds of butterfat and 1,607 pounds of milk with a 3.5 per cent test. The averages were made by the 27 cows in the herd of the Red Rose Research Farm, 221 Pitney Road, Lancaster.

Other cows completing lactations with over 800 pounds of butterfat were in the herds of Elam P. Bollinger, John U. Lapp, Elam B. Beiler, and B.

(Continued on Page 13)

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average near the normal temperatures for this time of year. Normal temperatures range from 67 in the afternoon to 46 at night. Cooler temperatures over the weekend will be followed by a moderating trend each day thereafter. A few widely scattered showers are expected Saturday.

* * * * *

Dairy cattle were active and higher at the October 9 auction. A total of 177 cows, six stock bulls and eight stock heifers were sold.

Fresh Holstein cows brought $275-425: Guernseys $150-30[illegible] and other breeds $150-35[illegible] Stock bulls were $140-210, and stock heifers $65-170.

The October 7 sale saw 26[illegible] head of horses and ponies sell at steady prices. Pony mares brought $40-100 while geldings were $30-100. Driving horses sold for $110-275, and riding horses brought $110-400 Killer horses were 6½ to 7 cents a pound.

The 494 market hogs at the October 7 sale sold steady. Retail hogs to local butchers brought 18.25 to 19; grades 1 to 3 went to the packers at 16.85 to 17.35, and heavyweights brought 15.60-16 75. Sows were 13 to 15.50.

Calf receipts of 114 head sold steady at the October 7 auction. Choice and prime vealers were 33-38; good and low choice 29-33; standard 25-29, and common 15-25.

Apply Lime

For land to be seeded to legumes in 1964, now is the best time to correct soil acidity, according to James Eakin, Penn State extension agronomist.

Usable water now available from all sources in the United States amounts to 515 billion gallons daily, with industry using the largest amount of the nation's non-consumptive water.

LANCASTER POULTRY CENTER

Broilers Jump Two Cents

Live broiler prices jumped more than two cents a pound at the October 10 auction over the previous week at the Lancaster Poultry Center.

A total of 52,300 broilers in nine lots changed hands at prices ranging from 16.4 to 16.7 for a sale average of 16 56. The previous week's average was 14.53. All broilers on sale were sold.

One lot of roasters including 980 head brought 21.0, and two lots of 1,950 leghorn fowl sold for 8.6 and 8.7.

A lot of 150 capons were withdrawn from sale at a bid of 24.0. The complete sale offered 55,380 head in 13 lots and sold 55,230 birds in 12 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in wks. and days, buyer and price.

CODE: L-F - Leghorn Fowl, WV - White Vantress, W Mt. - White Mountain, C - Cockerels.

1. Roy Heckenluber, 1200 L-F, V. J. Koser Co Inc. 8.7; 2 Carl Harnish, 750 L-F, Daniel K. Good, 8.6; 3. Miller & Bushong (Lester McMichael), 1500 WV, 8-6, Daniel K. Good, 16 5; 4. M&B (Benjamin Brubaker), 13,000 WV, 8-5, Daniel K. Good, 16.6; 5. Same, 9300 W Mt., 8-3, Starr Poultry 16.6.

● Delmarva

Prices Advance Full Two Cents

Live broiler prices continued to advance more than two cents during the 24 hour period ending 10:30 Friday morning. The Demand was good for the moderate auction offerings. Ready to cook demand was spotty, mostly slow to fair as dealers resisted the higher asking prices.

With practically no plants operating Saturday, estimated slaughter by eastern shore processors for the weekend was 808,000 head compared to the 858,000 head last weekend.

Prices at farms during the period ranged 15 0 to 16.6 for a reported 853,500 head including 432,400 head sold at Thursday's auction in Selbyville, Del. More than a third of the sales were at 16.5 to 16.6.

The Delmarva broiler-feed ratio for the week ending October 4 was steady at 2 8 when broilers averaged 14 27 and mash cost the grower $100.86 per ton.

Hanging men's suits on correctly designed hangers helps to keep the shape of coats and trousers. For coats, use wooden hangers designed so they are neither too wide nor too narrow for the shoulders. Leave the cost unbuttoned while hanging. Hang trousers by the cuffs on trouser hangers to prevent folds.

The number of cases of tuberculosis reported in Pennsylvania dropped from 7115 in 1958 to 5001 in 1962, and the death rate declined from 9.2 to 6.6.

From Where We Stand . . .

The Man in Management

Livestock management is coming to rely more and more on automatic devices and more and more on complicated equipment.

Next to poultry production, which has become almost totally automated of recent years, probably the most highly mechanized phase of agriculture production is the farrowing of baby pigs.

With the advent of the farrowing crate, the pig parlor, and related developments, the care of the sow and her offspring has become almost a science in itself.

This week Lancaster Farming carries a story of pig production which is just about as far from mechanization as you can get. But even with the lack of equipment, the 30 sow herd is handled with a minimum of labor.

Many people feel that because we run a story, we must necessarily endorse the methods employed. This is not so.

We neither approve nor condemn the practices outlined. We simply present them for what they are worth.

We do not believe there are any right or wrong practices in agriculture. There are many practices that will or won't work in a given set of circumstances. Many practices will or won't work for a particular farmer.

But we believe that the reason this system, or any other system, works is attention to detail. We believe that no machine or automatic control can compare to watchful care of a conscientious manager.

We still believe in the old adage, "The eye of the master fatteneth the cattle". No amount of equipment or automatios will ever replace a man as a decision maker.

At least that's how it looks from where we stand.

★ ★ ★ ★

Jobs Go Begging

"It is a fact that industry could use twice the men we can supply," according to Dr. M. E. John, Head, Department of Agricultural Economics and Rural Sociology, College of Agriculture, The Pennsylvania State University, "Strange as it seems, our problem is providing enough graduates."

Every so often we hear statements like this. It appears that while the demand for farmers is growing less and less each year as farms get larger and more land goes out of agricultural production, the demand in industry for men with agricultural backgrounds and educations grows larger.

Dr. David McClay, head of the department of Agriculture Education at Penn State said recently, "We graduated 30 men last year. We could have placed 60 men in good positions had the men been available."

Prof. Frank W. Peikert, head of Agricultural Engineering at the same university said, "Our department graduates 15 to 20 men a year. This is in sharp contrast to the three or four hundred requests for men we receive every year."

Dr. Larson, Dean of the College of Agriculture, said, the real enigma is that the nation's largest single business would be in the position of experiencing a shortage of qualified men.

Today, education in agriculture is education for businessmen that supply materials and services to farmers, he added. In fact it is becoming difficult to think of a business that does not deal, in some way with the food for our table and the land for our food.

Young rural people who do not find their place on the home farm would do well to look at agricultural opportunities before leaving the field for the factory.

At least that's how it looks from where we stand.

★ ★ ★ ★

Queen Of Fruits

Right out of hand, in a deep dish pie, an apple tart, smooth apple sauce, tangy apple butter, or a waldorf salad, the king of fruits richly deserves its high place in American diets.

Since October 10 to 19 has been designated National Apple Week, this might be a good time to do some stmpling of this wonderful fruit and enjoy it raw or in any one of the many different prepared forms.

A few years ago a Jamaican teacher of vocational agriculture spent some time with us. One day the conversation got around to apples and he explained that Jamaica has no apple trees.

His next observation was totally unexpected. "You have two varieties here," he said. "The red and the yellow." He had eaten imported apples in his homeland, but to him all apples fell into the two classes.

Of course, we explained that it is estimated that there are some 7,500 recognized varieties of apples and that nearly 50 of them are considered to be of commercial importance. He had no idea that there are varieties grown especially for baking, sauce, pies, juice, and for eating out of hand. (We learned just about the same thing about bananas. Did you know we get ONLY two varieties in this country?)

Even though some tropical peoples do not know apples well, they are the best known and commercially most important fruit of the Temperate Zone. No other fruit comes near them in universal appeal, versitality or use. They have been cultivated since before recorded history, and while they are believed to have originated in Asiatic countries, they are now grown in every country of the Temperate Zones.

No wonder our ancestors believed, "An apple a day keeps the doctor away."

This week end and next week, you could do a lot worse than to resolve to eat an apple and drink a glass of sweet cider every day. At least that's how it looks from where we stand.

★ ★ ★ ★

Seek "Soft" Detergents—Research into manufacture of "soft" detergents has gained impetus in the light of possible federal crackdown on the kinds that sometimes show up in foamy streams and tap water. The soap and detergent industry is expected to introduce soluable detergents by the end of 1965.

No Excuse

"Temporary hardship" is a deadly excuse for allowing drivers to keep their licenses after they've been convicted of serious or repeated traffic violations, Judson B. Branch, president of Allstate Enterprises, declared recently on behalf of the All state Motor Club. "Such offenders must be denied the privilege to drive rather than risk permanent hardship to innocent victims they might involve in accidents," Branch said.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Christian Purity

Lesson for October 13, 1963

Bible Material: Matthew 6:25-33, I Corinthians 5 through 7.
Devotional Reading: I Thessalonians 4:1-12.

THE WORD "purity" has almost lost its meaning. When a man is recommended for a position many questions are asked, but a question about his "purity" would be puzzling to many. Such is the degradation of the world in which we live, that there is very little notion of purity outside the Christian church. It is otherwise with other virtues and qualities. Last week in this space we thought about harmony. Every body—whether Christian or pagan—knows what you mean by that, even if he does not know harmony on the Christian level, or does not know that harmony at its deepest and best is not to be found outside the Christian faith. But purity—what's that?

Dr. Foreman

The Christian view of sex

If your denomination, has a bookstore, as most denominations do, you can buy from it one or more books recommended by leaders in your church on the subject of the Christian view of sex. There is no room here even to review any of these, only to say that there is more guidance available than you might have thought possible. Some basic elements in the Christian view will now be mentioned.

First of all, as we understand the New Testament, sex is not sinful in itself. If it were, all marriages would be wicked, and we should have to blame God for making the human race male and female. Sex is neither a bestial necessity nor an end in itself. The Christian ideal is that sex finds its rightful expression in marriage, and that before marriage virginity is God's ideal both for men and women. (The notion that purity is a strictly female virtue is pagan, not Christian.)

Christian motives again

There are many arguments for chastity. Margaret C. Banning wrote an article in which she makes the point that even from the standpoint of personal satisfaction and happiness, chastity is the ideal. But the Christian view goes farther than this. The New Testament teaches that each person's body, once God's Spirit has come to him or her, is now a temple of the Holy Spirit, and that fornication or adultery is a profanation and a sin, for that reason if for no others.

About the turn of the century there was a young Austrian who had been a lifetime member of the church, yet whose life was a constant series of sins against the Seventh Commandment. He did not believe that chastity was either possible or desirable. Then in God's providence he was led to make the acquaintance of two young priests about his own age. He discovered, somewhat against his will, because at first he could not believe they were genuine, that these men lived lives that to him were a continuous miracle. How can this be? he asked himself. He finally came to understand that chastity, like every Christian virtue, is supernatural. It is not possible (just as love in the Christian sense is not possible) without the Holy Spirit. This discovery was the turning point in his lifetime.

Sin against whom?

The sin of unchastity, or sins—for they have many forms—are like all sins, against what? Against marriage, against the love that is life's greatest human joy, against oneself, and against society But the important fact is deeper When Joseph was tempted by Potiphar's wife, he might have said, "How can I sin against you?" for the lady was really asking him to commit a crime against her. He might have said, "How can I sin against my employer?" against loyalty, against friendship? "How can I break the law of the land?" (for the Egyptians knew well that adultery was wrong) or "How can I sully my family's high ideals, and my own?" Joseph said something that must have sounded as strange to Potiphar's wife as it would to many ears today. "How can I . . . sin against God?" Joseph was not a monk, he was a highly practical and brainy young man, who later had a happy marriage. Yet it was not the future marriage which lay on his mind and heart; it was not just a family ideal. It was God who was more real to him at that moment than any woman there or in the future. The "practice of the presence of God" is the surest armor against sin.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Seal Silos

Much can be done to reduce the amount of spoilage on the top of all kinds of silos With the upright silo the chopping of several loads of poor quality forage of green weeds will eliminate the loss of much good feed. With the horizontal silos much more surface is exposed and more care is needed The use of plastic covers is very worthwhile if the plastic is weighted down tight. Air must be kept from under the plastic; a few boards or old tires will not be enough. Use soil, sawdust, or chopped green forage of poor quality.

To Destroy Weeds

If weeds did get ahead this year in the garden, truck patch, or around the farm buildings, they will go to seed and bring a larger crop of weeds next year. We suggest that these weeds but cut, dried and burned in order to destroy the seeds. A weed crop this year is sure to produce more weeds next year. Don't let it happen.

To Be Alert For Soft Corn

The early frost caught many fields of immature corn; the silo was the best place for this soft corn. It this is not possible, then it should remain in the field as long as possible in order to dry out. The cribbing and storage of this soft corn should include some extra drying and ventilation, Heat-drying units, forced air ventilat[illegible] and extra air [illegible] caution will be needed in [illegible] to keep the corn from molding.

To Try Forage Testing

The winter feeding season is approaching with many producers in need of additional grain and forage. The grain feeding program should be determined by the amount and quality of forage on hand. A forage test for either dairy cattle or beef cattle may include a grain ration recommendation without extra cost. We hope that more dairymen and livestock producers will make [illegible] of this testing service. It will pay you in the end.

State Oats Crop Is Better Than Early Estimates

HARRISBURG — Pennsylvania's surprising oats crop stumped the experts this year.

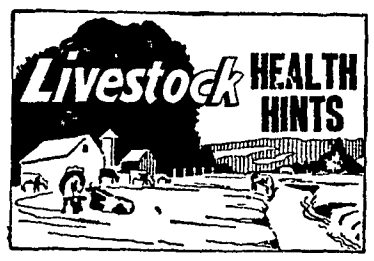
In June, the Pennsylvania Crop Reporting Service forecast a record yield of 48 bushels per acre, and a month later they revised the figure upward to 50 bushels

Today the PCRS said late harvest reports indicate the yield will hit a whopping 54 bushels per acre average. That tops the previous record of 47 bushels, set in 1961, by 15 per cent.

Some farmers reported phenomenal yields of 100 bushels an acre, according to Dewey O. Boster, chief of the State Agriculture Department's Crop Reporting Service.

"I've never seen anything like it," one crop reporter commented.

Total yield is estimated at 32 million bushels, a 25 per cent increase over last year, Boster said.



Prepared by American Foundation for Animal Health

At a time when the nationwide effort to eradicate hog cholera should be picking up momentum, there are signs that some ground may actually have been lost in one of the key points of the program.

That key point is vaccination. Authorities agree that at least 75 per cent of the nation's swine need to be vaccinated, to provide a solid wall of immunity against cholera, our No. 1 hog killer. In

With fall outbreak season for hog cholera just ahead, every herd should be vaccinated NOW.

1961 cholera vaccinations reached only 4[illegible] per cent

Even more there now is a serious indication that vaccinations actually decreased in 1962. This is serious

It has been estimated that hog cholera costs the farmers of this country about $60 million each year That figures at about $1 for every head of swine in the nation.

But, farmers who lose pigs to cholera will suffer far greater losses A recent study showed that the loss of 100 pigs at 100 pounds would amount to about $875 in feed alone Yet those hogs could be protected through vaccination for about one-tenth the loss figure.

There are many factors to be taken into consideration if the desired solid immunity is to be achieved It is important to have hogs vaccinated at the right time, with the right type of vaccine and when pigs are in proper condition. For this reason, it is important to have a veterinarian check the herd before vaccination; and it is also best to leave it up to the veterinarian to determine the best type of vaccine to use under the circumstances.

Unfortunately, many farmers have become content to gamble with cholera because they have gotten by for a few years without an outbreak. Actually this makes no more sense than cancelling a fire insurance policy because there have been no fires on the farm. Better have them vaccinated before fall outbreaks start, and be safe!

TOBACCO DOES NOT GROW on the Jutland Peninsula of Denmark, Frede Helth tells host father, Leroy G. Myer, as they look at a lath of partly cured leaf Helth, an international Farm Youth Exchangee, right, had never seen tobacco growing before coming to the county. Myer was just ready to leave when the photographer arrived. He said he did not feel like a farmer in his suit L F. Photo

become an engineer will probably not take over the home farm of 50 acres Helth says he would like to become a teacher of agriculture and teach in a Far Eastern country.

Before coming to Lancaster County he spent time on three farms in Mississippi and two in Westmoreland County, Pennsylvania He is scheduled to leave the county today for another farm in Eastern Pa before returning to Denmark on November 16.

Farm Women Name Officers

Mrs. Abram Bollinger was reelected president of Society of Farm Women No. 1 at the meeting held on Saturday afternoon at the home of Mrs. Clayton Sangrey, Lititz R.D 2.

Other officers reelected were as follows, Mrs. Sangrey, vice-president, Mrs. Ira Shearer, recording secretary, Mrs Joseph Russell, corresponding secretary; Mrs. John Newcomer, treasurer; and Mrs Roy Brubaker, in charge of music.

Mrs. Kenneth Eshelman, president of the County organization, was present. She stated a new group, Number 25 had been formed The County Convention was also announced to be held on November 2 in Penn Manor High School. She told the group the organization is fifty years old this year and recognition will be given at the State Convention at Harrisburg in January. The local group was invited to participate and will depict the period of 1924.

Mrs. Henry Shreiner was in charge of devotions. The roll call was answered by displaying a party favor and dues were paid. Mrs. Joseph Kreider and Mrs. George Trump demonstrated making corsages and dried arrangements.

The next meeting will be held at the home of Mrs. Willis Bucher, Lititz R2, with Mrs. Guy Reidenbaugh as cohostess.

Gorst Named To Soil Board

HARRISBURG — State agriculture Secretary Leland H. Bull today announced the appointment of William N. Gorst, Evans City, as acting director of the Soil and Water Conservation Commission in the Department of Agriculture.

Gorst will take over the duties of David G. Unger, Mechanicsburg, who is on leave for graduate work in public administration at Harvard University.

Secretary Bull announced also that Robert G. Struble, Kennett Square, has been selected as commission secretary in Unger's absence.

Since 1957 Gorst has served as the commission's western field representative. He is a graduate of Antioch College and did graduate study at the University of Michigan where he earned a master's degree in natural resource development and administration.

Struble has been with the commission as consultant in soil conservation and watershed development He is nationally known in connection with the Brandywine Valley conservation program in Chester county.

Farm Women 10 Host Husbands

Farm Women 10 entertained husbands and guests at a banquet last Saturday evening at the Meadow Hills Dining Room.

Sixty-six attended the event. Major and Mrs William Fox showed pictures of Hawaii and talked about their experiences in that state.

Special guests for the evening was Mrs. Kenneth Eshleman, president of the County Farm Women, and her husband. Mrs. Eshleman spoke briefly to the group.

At a business meeting the society decided to make Thanksgiving table arrangements for the hospital at Embryville on Oct. 17. They will meet at the home of Mrs. Frank P. Hodecker, 907 Rohrerstown Rd. on that occasion. On Oct. 26 the arrangements will be taken to Embryville. Anyone wishing to go along for the trip, which will include luncheon, should contact Mrs. Hodecker.

On Oct. 16 the group plans to sew at the General Hospital with Society 9 The group will also serve treats at the County Home during the month of October.

Christmas Seals will be folded at the Health and Welfare Center on Nov. 4.

Mrs. Harry Shuman talked to the society about the original organization of the Farm Women Society 10, 40 years ago. She is a charter member of the group.

Members are urged to bring something for the bazaar table at the Nov. 2 meeting of the county convention.

Traffic accidents will not subside until motorists learn to make driving decisions correctly quickly and regularly. The average city driver must make as many as 2,000 decisions a day behind the wheel, proof enough of the need for constant driver attention and a willingness to adjust to conditions.

Loss of the thumb destroys one half of the hand's function, and loss of thumb and first finger almost completely destroys the usefulness of the hand.

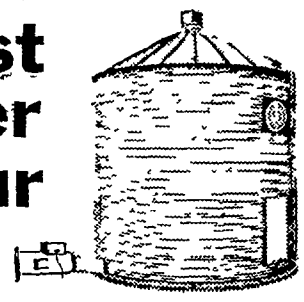
New, Low Cost Artificial Dryer Can Solve Your Wet Corn Problem



Has a slow growing season, plus an early frost left you with wet corn? If this is your problem, now is the time to do something about it *Your County Agent is recommending artificial drying*

A Circle Steel drying and storage bin from Grove Manufacturing Company is not only one of the best, but lowest cost solution to this problem Considerably less than other installations, a Circle Steel bin will give you the advantages of on the farm artificial drying at an initial cost of only $3,000 to $5,000, and can easily be financed over a long term

They go up in just a couple of days; they're permanent, durable buildings. Circle Steel bins are bottled gas fired, so simple, they're almost foolproof They have been proven in the midwest grain belt for wheat, soybeans, and shelled corn.

THIS IS THE YEAR TO DO IT

A Circle Steel dryer can pay off fast with this year's wet corn For example, using 1000 bushels of wet shelling (25%) corn as a basis, here's what happens when you dry to (15%) corn selling for $1.20 per bushel

1000 bushels of wet shelled (25%) corn would bring $915 00 after 3¢ per point dockage.

Dried to 15% moisture, the original 1000 bushels shrunk to 882 bushels brought $1,059.00.

$1059 00	dry
915 00	wet
$ 144 00	more for the 1000 bushels after drying

That's 14 4 cents per bushel more for dry corn!

With a Circle Steel Bin from Grove you can dry corn for a few cents a bushel That's better than 10 cents a bushel profit.

OTHER ADVANTAGES TOO

- drying and storing permits you to sell when the market price is at its highest
- allows harvesting at 26% to 28% morsture content, reducing ear drop and snap and roll shelling losses.
- prevents molding, rodent and other insect damage.

COMMERCIAL COMPARED TO FARM DRYING AND STORAGE

With your own drying and storage facilities, you have a far more efficient operation. There's no longer any need to tie up a truck and driver for hours on end waiting his turn to unload at the elevators during peak harvest and selling days. Plus keeping better control of your moisture loss and actual weight, you save additional profits by drying your own crop.

LAST MINUTE DEAL

As Grove Dealers for Circle Steel bins, we have a special wet corn program that will have you drying and storing your corn in as little as a week's time—with little effort on your part—at a cost that will surprise you.

Call, visit or write one of these GROVE dealers, TODAY!

Growing HEIFERS and Dry COWS need

Wayne FITTING RATION

Wayne Fitting Ration produces rugged, full-bodied heifers that are thrifty and ready to breed at an early age. Fitting Ration also helps the dry cow replace flesh lost during the previous lactation and puts her in top condition to start the new milking period at a high level of production.

Bred heifers and dry cows must receive a highly nutritious ration in order to build the unborn calf. Wayne Fitting Ration supplies the vitamins, minerals, proteins and energy needed to drop thrifty, strong-boned calves.

In a test at the Wayne Research Farm, well fitted Holsteins produced 1720 lbs. more milk and 83 lbs. more fat than when not properly fitted.

Use Your "Noodles"

By Mrs. Richard C. Spence

Use your "noodles" to make delicious supper and luncheon dishes! From wide to narrow, noodles take the stage in a starring role to bring you dishes of top flavor, nutrition and appearance.

WHAT'S IN A NOODLE? Noodles are made from the same basic ingredients as macaroni and spaghetti. However, in addition, noodle products are required by law to contain a minimum of 5.5 percent egg solids, thus are called egg noodles. Egg solids may be added in fresh powdered or frozen form. Only the yolk is used because the whites tend to make noodles tough.

Marco Polo brought noodles to Italy when he returned from his explorations in the Orient. These delicious morsels were a favorite food among the Chinese and quickly became a specialty of Italian cooks. Soon, the fad for this new dish spread from country to country across Europe; and since then noodles have become a favorite food around the world.

Every nationality has its special way of preparing them, but noodles are especially good in the Florentine style — with spinach.

HAM-NOODLE FLORENTINE

2 cups uncooked egg noodles
1 package (10 ounces) frozen spinach, chopped, cooked, drained
½ pound cooked ham, cut in thin strips (1½ cups)
1 can (10½ ounces) condensed cream of celery soup, undiluted
1 cup grated American cheese
2 tablespoons milk
1 tablespoon prepared mustard
¼ cup soft bread crumbs
Paprika

Heat oven to 375 degrees. Cook noodles in boiling salted water until tender; drain. Combine with spinach and ham in 1½ quart casserole. Combine soup and next 3 ingredients; mix lightly but well with noodle mixture. Top with bread crumbs; sprinkle with paprika. Bake 30-35 minutes or until hot. Makes 4-6 servings.

* * *

In the German style, bake noodles in a ring mold with nutty-flavored Swiss cheese and a rich cream sauce until they achieve a smooth custard-like texture. Fill this noodle ring with buttered broccoli for a truly delicious vegetable course.

GERMAN NOODLE RING WITH BROCCOLI

3 cups medium noodles
1 can (10½ ounces) condensed cream of celery soup, undiluted
1½ cups grated Swiss cheese
½ teaspoon paprika
½ teaspoon salt
⅛ teaspoon pepper
3 eggs, slightly beaten

Heat oven to 350 degrees. Cook noodles in boiling salted water until tender; drain. Combine soup and next 4 ingredients in a saucepan. Heat, stirring occasionally; until cheese is melted. Gently mix cheese mixture with eggs and noodles. Pour into 1-quart greased ring mold. Set mold in pan of warm water. Bake 45 minutes or until knife inserted in center comes out clean. Let stand 10 minutes before unmolding. Fill center with cooked, buttered broccoli. Makes 6-8 servings.

Ham - and - Cheese Noodle Ring: Add 1 cup diced cooked ham with noodles. Omit salt.

NOTE: American or sharp cheddar cheese may be substituted for the Swiss cheese.

* * *

Another traditional German favorite, sauerbraten, is delicious atop a tender nest of piping hot noodles.

OLD STYLE SAUERBRATEN WITH NOODLES

3½ pound beef pot roast (blade or round-bone)
1 cup vinegar
1 cup water
1 large onion, sliced
2 tablespoons sugar
2 teaspoons salt
½ teaspoon peppercorns
½ teaspoon whole cloves
2 bay leaves
1 lemon, thin sliced
2 tablespoons butter or margarine
1 tablespoon flour
2 tablespoons flour
¼ cup raisins
½ cup gingersnap crumbs
12 ounces broad noodles

Wipe pot roast with clean damp cloth and place in large glass bowl. In a saucepan, combine vinegar, water, onion, sugar, salt, peppercorns, cloves, and bay leaves. Heat to boiling, and pour over pot roast. Alow to cool. Add sliced lemon, cover, and set in refrigerator. Marinate 24 to 36 hours, turning two to three times. Remove meat from marinade and drain thoroughly. Strain marinade and reserve. Heat butter or margarine in heavy kettle. Sprinkle meat with 1 tablespoon flour and brown slowly on all sides. Gradually add half of the marinade, stirring constantly. Continue stirring until all the browned flour and fat are blended into liquid.

Cover and simmer about two hours or until meat is tender, stirring occasionally. Add the 2 tablespoons flour, mixed with a little water. Add raisins, remaining marinade, about 1 cup water, and gingersnap crumbs. Simmer 10 minutes to blend well. Meanwhile cook noodles in boiling salted water until tender (about 7 minutes). Drain. Arrange on hot platter and place meat on top. Pour a little gingersnap gravy over all, and serve remaining gravy as an accompaniment. Serve very hot. Makes 6 to 8 servings.

be outdone in noodle preparation. They take noodles and spice them with an American favorite, ketchup. With green pepper, savory onions and cheese stirred in, wide egg noodles become the perfect accompaniment for a meat loaf. Add fresh fruit salad and rich chocolate cake for a satisfying dinner.

SAVORY NOODLES

- ½ cup chopped green pepper
- ¼ cup chopped onion
- 2 tablespoons butter or margarine
- ⅓ cup ketchup
- ¼ cup water
- ¾ cup (1 8-ounce jar) cheese food
- 3 cups cooked noodles (4 cups uncooked)

Saute green pepper and onion in butter until tender. Blend in ketchup, water and cheese; stir occasionally over low heat until cheese is melted. When thoroughly heated, combine with hot noodles. Makes 4-6 servings.

CHEESE-TUNA TETRAZZINI

- 1 package (7 ounces) noodles
- 2 tablespoons butter
- ¼ cup finely chopped parsley
- ¼ cup minced onion
- 2 tablespoons flour
- ½ teaspoon salt
- Dash of pepper
- 1½ cups milk
- ¾ cup shredded Cheddar cheese
- 1 can (2 ounces) mushrooms stems and pieces with liquid
- 1 can (9¼ ounces) tuna, undrained
- 2 tablespoons butter, melted
- ½ cup coarse bread crumbs

Cook noodles until soft. Meanwhile in a saucepan melt 2 tablespoons butter; add parsley and onion and saute until onion is transparent. Blend in flour, salt and pepper; gradually add milk. Cook over medium heat, stirring constantly, until mixture thickens. Remove from heat; add cheese and stir until melted. Add mushrooms, tuna and spaghetti. Turn into a shallow 2-quart casserole. Mix together 2 tablespoons melted butter and breadcrumbs; sprinkle on top of casserole. Bake 15 to 20 minutes in a 425 degree oven. 4-5 servings.

* * *

NOODLE PUDDING

- ¼ pound wide noodles, uncooked
- 3 egg yolks
- ¾ cup sugar
- ½ pound cottage cheese
- 1 pint commercial sour cream
- ½ teaspoon salt
- ¼ cup raisins
- 1 teaspoon vanilla
- 3 egg whites

Cook noodles 15 minutes in boiling salted water; drain; do not rinse. Combine egg yolks, sugar; blend thoroughly. Add cheese, sour cream, salt, raisins, vanilla, noodles; blend well. Beat egg whites until stiff but not dry; fold into noodle mixture. Grease 9 x 13 x 2-inch baking pan; pour noodle mixture into pan; spread evenly. Bake 50-60 minutes at 350 degrees or until silver knife comes out clean. Serve directly from pan. 8 servings.

Worth Knowing Anytime

THURSTON

Chocolate milk and chocolate drink are not the same. Chocolate milk is whole milk with chocolate syrup added; chocolate drink is partly skimmed milk with cocoa power added.

A new line of table mats has been introduced. Available in oblong and oval shapes, these pads are made of vat-dyed burlap, coated with a light film of vinyl to make the surface stain-and-spill-resistant A urethane backing on the underside of the burlap serves as a padding and an anchor The pads come in 12 colors.

When you shop for corduroy this fall, you may find an all-cotton stretch fabric. Up to now, the only domestic stretch corduroy has been a blend of cotton and nylon. The all-cotton stretch fabric will be 36 inches wide.

A new kind of towel with a velvet-like finish on one side and terry cloth on the other has been introduced. Shearing the ends of the terry loops produces the velvet-like finish. Shearing also exposes the ends of the fibers and this increases the absorbency of the towel.

Why Use Interfacing?

Interfacing in home sewing helps give that desired profes-

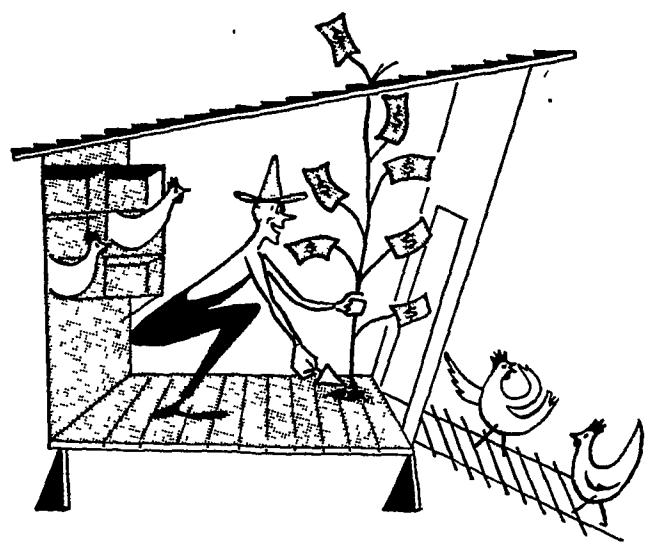
in your hen house



RED ROSE®
POULTRY FEEDS

You can plant profit in your hen house when you use Red Rose Poultry Feeds!

Hens need a house that will develop their full egg laying potentral, and one that is good enough to meet the nutritional requirements of layers under the strain of heavy laying.

Red Rose Laying Mash, Red Rose Complete Laying Ration, and Red Rose Booster Pellets are the feeds you need to raise your layers. These feeds are outstanding in effective quality and contain the necessary nutrients, minerals and vitamins needed by layers . . . and produce the results you want.

Place Red Rose Poultry Feeds in your hen house. You'll be gathering more eggs if you do.

sional look in garments you're making. Interfacing helps prevent sagging, adds firmness where and when needed, increases life of the garment, reinforces seams, and gives better shape to certain parts of the garment.

Interfacing is usually needed between a part of the garment and its facing, such as yokes, collars, cuffs, closings, and inside skirt waistbands.

Interfacing material should be pliable and never heavier than the fabric it supports.

Types Of Raincoats

Raincoats are of two general types — those that breathe and those that don't.

An all-plastic coat that fits into a pocket is one type of a raincoat that doesn't breathe. It's a completely waterproof type coat, and usually inexpensive. But a raincoat that doesn't breathe has one distinct disadvantage . . . the air can't penetrate the fabric and you'll feel uncomfortably warm after wearing the coat for a while. If you buy this type of coat, be sure there are vents under the arms and the collar.

The water-repellent coat or the coat that breathes is the most popular type. It is made of woven fabric that locks out the wind and rain but allows body vapors to escape from within. These coats are more expensive than the completely waterproof coat of all plastic. Fabric coats come in plaids, solids, and prints and in a wide range of colors. When buying a water repellent coat, read the label for information on its care. The finish may be durable or temporary, and the label should state whether the coat can be washed or if it must be drycleaned.

Meaning Of Some Rug Terms

American Oriental is sometimes applied to American-made rugs that follow Oriental patterns and colors.

Textured refers to a surface effect obtained with the use of different pile lengths, different kinds of yarn, or a combination of cut and uncut pile.

Brocade is a term used to describe a carpet or rug with an engraved effect produced by using heavy twisted yarn tufts on a ground of straight fibers.

Farm Women 22 Elect Officers

Mrs. Donald Esbenshade was elected president of Society of Farm Women 22 at a recent meeting in the home of Mrs. Kenneth Habecker, Lancaster R1. Mrs. Paul Witmer was cohostess.

Other officers elected include Mrs. William Weller, vice president; Mrs. Henry Hess, secretary; Mrs. Harold Rudy, recording secretary, and Mrs. Lloyd Herr, treasurer.

Theme was a halloween party Roll call was answered by "ideas for next year's program". Costume prizes went to Mrs. Donald Esbenshade, ugliest; Mrs. Lester Landis, funniest; Mrs. Charles Fisher, prettiest; Mrs. Harold Rudy, most original. Prizes were awarded by Mrs. Paul Witmer and Mrs. Hebron Herr.

The next meeting will be held at the West Willow fire hall on Nov. 12 at 1:30 p.m. when members of Society 13 will be entertained.

Farm Women 17 Hold Meeting

The October meeting of Farm Women Society 17 was held recently in the home of Mrs. Robert Burking, near Liberty Square.

Mrs. Samuel Wenger, vice president was in charge of the meeting. Roll call was answered with "short cuts in cooking and sewing."

Dates of coming events announced included the County Farm Women Convention on November 2, the beef pit barbecue of the Solanco Fair Association at the Quarryville Farm Bureau on October 12, and a rummage sale October 28 and 29 at 45 S. Duke Street, Lancaster.

Next meeting will be a Halloween party at the home of Mrs. Samuel Rineer, Buck. Cohostesses for the meeting were Ruth Shenk. and Verna Lloyd.

Farm Women 7 To Meet Today

Farm Women society 7 will meet at 2 p.m. this afternoon in the home of Mrs. Frank Lichty, Paradise. Hostesses will be Mrs. Ethel Rice, Mrs. Ruth Lichty, and Mrs. Jean Lichty.

The program will feature the preparation of cancer dressings.

Driving alertness should be increased and speed reduced as the clear width of road ahead narrows. Two cars approaching each other at 60 mph, close a 1,000 foot gap between them in just over five seconds.

For The Farm Wife

(Continued from Page 9)

PAPRIKA CHICKEN NOODLES

- 4 tablespoons butter or margarine
- 1 cup onion slices, separated into rings (1 large onion)
- ¼ cup enriched flour
- 1 tablespoon paprika
- 1 teaspoon salt
- ¼ teaspoon pepper
- ¼ teaspoon basil, crushed
- 2 cups chicken broth or chicken bouillon (dissolve 2 chicken bouillon cubes in 2 cups boiling water)
- 2 tablespoons ketchup
- 2 cups sliced cooked chicken or two 5½ ounce cans chicken
- ⅓ cup dairy sour cream
- 8 ounces medium noodles

Melt butter or margarine in large skillet. Cook onion in butter or margarine until transparent. Combine flour, paprika, salt, pepper and basil. Stir flour mixture into onion mixture. Gradually add chicken broth and ketchup, stirring until smooth. Cook until thickened, stirring constantly (about 5 minutes). Meanwhile, cook noodles in boiling salted water until partially cooked 3 to 4 minutes. Drain. Remove sauce from heat. Stir chicken into sauce. Slowly stir in sour cream, about 2 tablespoons at a time Fold in noodles, mixing lightly until all noodles are covered with sauce. Turn chicken-noodle mixture into shallow lightly greased 2-quart casserole with cover Cover and bake in moderate oven (350 degrees) 20-25 minutes or until heated through 4 to 6 servings.

* * *

In France, "rechauffe" means a method of reheating left over meat. Beef Rechauffe is delicious served over hot buttered noodles. Or, mold the noodles into a ring and fill the center with the beef

BEEF RECHAUFFE

- 1 cup sliced onions
- 2 tablespoons butter or margarine
- 2 cans (10¾ ounces each) condensed tomato soup, undiluted
- 1½ tablespoons vinegar
- 2 tablespoons water
- 1 teaspoon salt
- ⅛ teaspoon pepper
- Dash crushed rosemary
- ¾ pound cooked beef, thinly sliced (2 cups firmly packed)

Saute onions in butter. Add soup and remaining ingredients, cover, simmer 20 minutes to blend flavors Serve over hot buttered rice or hot buttered noodles Makes 6 servings

* * *

MARTHA'S COMPANY CASSEROLE

- 4 cups broad noodles (½ pound)
- 1 tablespoon butter or margaine
- 1 pound ground chuck
- 2 8-ounce cans tomato sauce
- ½ pound cottage cheese (1 cup)
- 1 8-ounce package soft cream cheese
- ¼ cup sour cream
- ⅓ cup minced scallions
- 1 tablespoon minced green pepper
- 2 tablespoons melted butter or margarine

Cook noodles as package directs, drain Saute meat until browned in a buttered skillet. Stir in tomato sauce Remove from heat Combine cottage cheese and next 4 ingredients. In 2-quart casserole, spread half of noodles, cover with cheese mixture, then cover with rest of noodles Pour melted butter over noodles, then tomato-meat sauce Bake for 45 minutes in a 375 degree oven Serves six.

* * *

FRENCH-FRIED NOODLES

Heat fat in deep fryer to 375 degrees. Place about a cup of uncooked fine noodles in a fine mesh strainer and lower into the hot fat slowly Fry the noodles until golden brown (about 2 minutes). Repeat until all the noodles (8 ounces, or more, if desired) are fried. Drain and sprinkle with 1 teaspoon salt. Use immediately or store in covered container. French-Fried Noodles will keep 2 to 3 weeks.

* * *

QUICK CURRANT COFFEE CAKE

- 6 tablespoons (¾ stick) butter
- ½ cup sugar
- ¼ teaspoon vanilla
- 1 egg
- ½ teaspoon caraway seed
- ½ cup dried currants
- 2 teaspoons baking powder
- 2 cups sifted flour
- ¼ teaspoon baking soda
- ¼ teaspoon salt
- ⅔ cup buttermilk
- ½ cup sifted confectioners' sugar
- 1 tablespoon milk.
- ¼ teaspoon vanilla

Butter and flour 8-inch cake pan; set aside. Cream butter and sugar, add vanilla and egg. Beat until light and fluffy. Blend in caraway seed and currants. Sift together flour, baking powder, baking soda and salt. Add to creamed mixture alternately with butter-milk, beginning and ending with dry ingredients. Pour into prepared pan; bake 45-50 minutes in a 350 degree oven. Cool in pan 10 minutes; remove to cooling rack. Combine confectioners' sugar, milk and vanilla, beat until smooth. Spread icing over top of warm cake Serve warm with butter.

CHECKERBOARD service bulletin

Make more milk next winter by feeding fall fresheners NOW!

Chances are, a good part of your herd is scheduled to freshen early next fall . . . when milk prices are best.

As your cows dry off this summer, make sure they get every chance to improve in condition, increase body weight and lay in reserve strength for a long, profitable lactation ahead by feeding PURINA D & F CHOW as recommended by Purina Research!

Test after test at Purina's Research Farm prove just 125 lbs. extra body condition built up during the dry period (Holsteins) can add up to 2000 lbs. more milk in the next lactation. Ask for Purina D & F Chow at our store.

GRAIN SORGHUM REPLACES SOME of the corn on the farm of Walter Augsburger. He says the sorghum yields as well as corn, stands drought better and is easier to harvest. L. F. Photo

NOT MUCH EXPENSE FOR FEEDING equipment for these sows. Jacob Augsburger has just emptied a bag of feed on the ground for part of the 30 sows owned by him and son, Walter. Sows get water from the stream in the pasture and are never confined to a barn. L. F. Photo

• AUGSBURGER

(Continued from Page 1)

including all the sows in the herd.

Augsburger says he does not recommend his system to everyone. You have to know your hogs and watch them carefully when they are ready to farrow, he said.

Sows that are about ready to farrow should be in a pasture by themselves, he believes, and those that will not farrow for several weeks should be in a separate lot.

He said, sows in a farrowing crate do a lot of moving around, but "We had three sows to farrow last night and they are still laying just where they were when they began farrowing."

Augsburgers have several converted poultry range shelters in the pasture. In cold and snowy weather the sows will go into these shelters, but when the weather is warm, they usually have their pigs in a nest in the open. After the sow has finished having her pigs, the shelter is put in place to protect the new litter from sun and rain.

At eight weeks the pigs are weaned and castrated before being put in the feeding pen where they are fed a mixture of home grown grains and a supplement in an automatic self feeder system. Some 225 are now on feed. Approximately 500 to 600 are fed each year.

The sows get the same basic mixture with a higher per centage of protein and alfalfa hay or pellets ground with the grains. The sows are fed on

Choose From The Long Green Line Of John Deere Equipment

• AUGSBURGER

(Continued from Page 12)

the ground just once a day with the whole process taking only a few minutes.

Home grown grains include corn, about 43 acres harvested with a picker-sheller and heat dried; wheat, about 10 acres; barley, 16 acres, and rye, about 12 acres.

For the past several years, Augsburger has planted about eight acres of grain sorghum which he substitutes, in equal amounts, for corn. He says the yield of sorghum is "right up with corn", and it seems to stand dry weather better, but the big reason for growing sorghum is ease of harvesting. The sorghum is planted on a hillside where a cornpicker would slide down and run some of the rows down. The combine also slides down the hill, but it does not miss the grain.

Walter graduated from high school in 1954 and entered into a partnership with his father in January of 1955. The elder Augsburger had been farming since 1940, but his program included steers as well as hogs and chickens.

In 1961 the partnership completed a cage layer house which now contains 10,000 layers. Another 8,000 layers are on slotted floor pens in the barn. 5,000 chicks and 5,000 pullets for replacements complete the poultry program. All the chickens are fed a commercial mix.

Manure disposal was a major problem for the Augsburgers until they constructed a lagoon. Now the manure is liquefied by adding water and the liquid is spread on the fields. Most of the manure is plowed down, but small grain is top dressed when the ground is frozen.

Labor is one of the major costs of production in agriculture, and the Augsburgers have cut this item to a minimum. The program may not work for everyone, but it does for this father-son team.

Redcoat Will Be Half Of State's Wheat

HARRISBURG — More than half of Pennsylvania's certified seed wheat this year will be the new Redcoat variety.

The State Agriculture Department today announced that 2,068 acres of Redcoat had been approved for certification. Pennoll was next with 1,269 acres followed by Dual, 417 acres, and Seneca, 313 acres.

Certified seed wheat acreage, at 4,068, is 16 per cent above last year.

Poor crop appearance and the presence of garlic, thistles and quackgrass resulted in rejection of 466 acres, according to C. F. Campbell who is in charge of the seed certification program in the department's Bureau of Plant Industry.

Yield per acre ran as high as 59 3 bushels, with the average at 39 9 bushels. Barley for certified seed topped at 66 bushels an acre and averaged 43.7 bushels.

A total of 782 acres of registered wheat seed, from which certified seed will be produced later, also was approved.

Dairy Herds Heading For Record Year

HARRISBURG — Pennsylvania dairy cows appear headed for another record performance this year.

Only 850,000 cows were in milk herds at the end of August, the lowest number since 1939, according to the Pennsylvania Crop Reporting Service. But milk production in the first eight months of this year averaged 5,792 pounds per cow, 6 per cent higher than last year's January-August average.

At this rate, the report noted, annual milk production per cow could reach 8,500 pounds compared to last year's record 8,080 pounds.

Average production per cow in August, estimated at 680 pounds, is 5 per cent above the previous August, and 12 per cent higher than the 1957-61 average.

Total milk production in the state of 578 million pounds in August was 3 per cent higher than a year and 7 per cent above the five-year average.

Grain feeding, heavier this year, was 149 pounds more per cow than in the first eight months of 1962.

• DHIA

● 4-H

(Continued from Page 1)

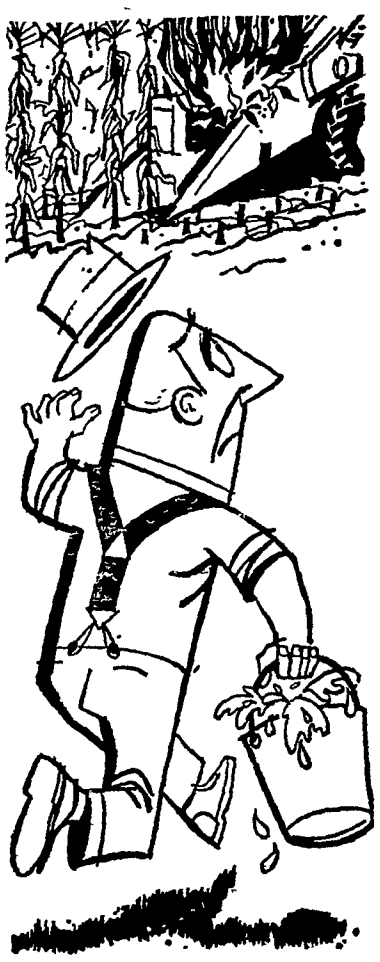
Farm Show Building at Harrisburg this week.

The girls, Cynthia Bucher, Lititz R2 and Virginia Wivell, Columbia R1 won a blue ribbon for deboning a chicken. They competed with thirteen states. They represented Pennsylvania.

The girls first appeared in the competition of 4-H demonstration at Penn Manor High School where they received first place that entitled them to the District meet at Allentown where they again placed first. Pennsylvania State University held the state contest and the girls ranked first again.

The girls were given a tour through the State Capital and met the Governor when they were feted at a banquet at the Penn Harris Hotel where the award was given.

Cynthia is the daughter of Mr. and Mrs. Willis Bucher and is a senior at the Manheim Central High School. Virginia is the daughter of Mr. and Mrs. Clyde Wivell and is a senior at Donegal High School.



CARRY A FIRE EXTINGUISHER ON YOUR TRACTOR — corn is dry and heat may cause a fire

Joan Martin Is Runnerup Poultry Princess

Lancaster County's representative in the Poultry Princess contest was named second runner up this week at Harrisburg.

Miss Joan Martin, Intercourse, sponsored by Hess Brothers Farms, Inc., Ephrata, competed against 13 other contestants at the Northeast Poultry Producers Council (NEPPCO) convention.

JOAN MARTIN

Winner of the title was blue eyed, blonde Pat Matthews of Salisbury, Maryland First runner-up was Janet Didriksen of Vineland, N J. The retiring Princess, also from Maryland, is Miss Carol Ann Kleinwachter.

Miss Martin, eighteen, graduated last June from the Pequea Valley High School She is five feet four inches tall, has green eyes and sandy colored hair An avid sportsman, Joan lists horseback riding as her favorite sport. She will receive a $100 savings bond.

County Firm Wins Award At NEPPCO

Hess Brothers of Ephrata finished in a four way tie for best of the show gold award in market egg competition this week at the 26th annual Northeast Poultry Producers Council (NEPPCO) show at Harrisburg.

The Ephrata firm exhibited two enrties which tied for first place with two entries from the Twin Valley Farmers Exchange of Hegins. Exhibitors came from 14 Northeastern states.

All four of the entries were displayed on the exposition's "Boulevard of Champions" during the three day show.

RECORDS TELL SUCCESS STORY

VETERAN FEEDER MAKES RECORDS WITH FARM BUREAU SUPPLEMENT.

A. R. "Abe" SHEAFFER, Columbia R.D.#2, widely known for his ability to feed beef cattle, is still making records and enjoying every minute of it. A long time feeder, "Abe" has used a combination of keen selection of feeder cattle, modern management practices and a sound feeding program to maximum advantage.

The records, listed below, were made on FARM BUREAU 50% PRO-BLEND SUPPLEMENT with Stilbestrol, Ground Ear Corn and Hay. Check them with your records—see how they compare. For detailed information of the FARM BUREAU Beef Cattle Program, call the FARM BUREAU STORE nearest you. We have a feed to fit your need . . . and a proven program for every feed.

Number Cattle	Date Purchased	Date Sold	Starting Weight	Market Weight	Days on Feed	Average Daily Gain
20	June 17, '63	Sept. 2, '63	1160 lbs.	1429 lbs.	77	3.49 lbs.

Start Today . . . Feed the Farm Bureau Way!

Qualified FIELDMEN are anxious to serve and assist you in designing a PROFITABLE BEEF FEEDING PROGRAM.
